My Portfolio Website description

This portfolio website serves as a showcase of my skills and expertise as a Computer Information Technology student at Lethbridge Polytechnic, specializing in web design and system administration. It highlights my hands-on experience in web development, network setup, and UI/UX design, demonstrating my ability to solve technical challenges with attention to detail. Additionally, it features projects and work samples that showcase my training in database management, programming, and networking principles, providing a comprehensive view of my technical and professional abilities.
